

Leveraging Technology in Education through Portal

Topic :	Leveraging technology in education through Portal
Date of event :	May 31,2011
Aim of the Event :	A session on the Leveraging technology in education through Portal was conducted for the staff of the RDIAS. All the features available in our portal were discussed so that everyone is able to fully explore and utilize the benefits of making optimum use of technology.
Event Report in brief:	<p>RDIAS portal serves as an entrance to a collection of features to serve a large audience-the students. The student portal gives our students a niche over others of using all the features and study material just a click away. They can submit their assignments; get placement and other institute related notices via web just by sitting at home.</p> <p>Faculty portals provide access to many services, including student emails, distribution of presentations, notes and campus announcements. Our portal also provides assistance for placements, alumni and career.</p> <p>Placement Portal -The web portal provides comprehensive details on students Placements. Its utility is to offers the ability to view placement trends using different parameters; viz. percentage of students placed in various industry segments, salary offered, number of offers received per student, along with the ability to compare trends across different academic years</p> <p>Alumni Portal - The web portal provides platform for the alumnus to reconnect with their Alma Mater. This includes secure login functionality, complete database of students who have studied at RDIAS, platform for students to re-connect with other alumnus, organize alumnus meet and other such events.</p>

	<p>Career Portal -SPMES believes in providing equal opportunity to one and all. Its utility id to provide opportunity to all to get associated with SPMES for their career advancements.</p>
