

## **Workshop on Web Technology**

### **11th Nov, 2009**

Workshop on Web Technology was organized in coordination with CMC for the students of MCA, focusing on making them cater to the development of static web sites in a professional way and accustom them with the importance of XHTML over HTML. CMC was ready to provide paid industrial training to students of MCA V Sem.

The agenda for conducting such event was to enhance the knowledge of students about the creation of static websites using the technology of XHTML and CSS.

The speakers were introduced by Mr. Rakesh Kumar Arora, program incharge to the audience. The speakers introduced CMC Ltd. and then discussed the following topics:-

1. XHTML
2. CSS
3. Templates

Mr. Naveen Arora, the workshop expert discussed about the static websites and dynamic websites. Further, he told the audience about various tools used to develop static and dynamic websites. He motivated students to use Integrated Development Environment (IDE) instead of Notepad for making websites. He referred to various websites where the students can explore and learn more about creating a website. He also cited some websites names where the students can deploy/upload the site free of cost.

The queries were handled exceptionally and intelligently by the expert. The session concluded.
