Guest Lecture

Topic :	Guest Lecture on “.Net”
Date of event :	21 st August, 2010
Profile of guest faculty :	The session was conducted by Mr. Akash, Sr. Software Engineer, Microsoft technology at AV Room-IIIrd floor between 2:00-4:00pm.
Description of the Event :	<p>Microsoft .Net technology is a technology intended to connect. It integrates with other tools and technologies to build compelling applications faster with less work. Keeping the importance of .Net technologies RDIAS has organised a Guest Lecture on .Net followed in the IT Industry. The session commenced with a brief introduction about the distinguished guest by Prateek (MCA-3rd semester Student) followed by bouquet presentation given by Divya (MCA- 3rd semester student).</p> <p>Mr. Akash, Resource Person for the event spoke on many details of .Net field. He emphasized that the .NET environment allows today's architects, analysts and developers to spend more time and effort focusing on their clients' business issues and less time wrestling with the limitations of the technology itself. The design of the .NET Framework is such that it supports platform independence. He focused that till today Microsoft has implemented the full framework only on the Windows operating system. He highlighted the architecture of .net, overview of Microsoft technology. He also included other topics such as:-</p> <p>Sever Side Technology</p> <p>Future Technology</p> <p>Components of .Net framework.</p>

	<p>Mr. Akash shared his experience of .Net framework. He also provides details regarding interview questions. The session was very interactive and he handles the student's queries in an eloquent fashion.</p>
