## Institute of Advanced Studies

App. by AICTE, HRD Ministry, Govt. of India & Aff. to G.G.S. I.P. University, Delhi

- Category 'A' Institute
- High Grading 81.7% by Joint Assessment Committee of GGSIPU & DHE, Govt. of NCT of Delhi.

Member of AMDISA. Member of AIMA

An ISO 9001 : 2008  
Certified Institute

### **“Online Test on Grammar, C Language, Logic and Reasoning”**

Topic :	Online Test on Grammar, C Language, Logic and Reasoning
Date of event :	28 Jan 2011
Aim of the Event	<p>At RDIAS, conscious steps have been taken to implement online tests for students in all subjects including general areas of proficiency like Grammar, C Language, Logic and Reasoning.</p> <p>As a part of that initiative, a session was organized for the students of MCA IV for enhancing their logical, grammatical and C programming skills.</p>
Event Description:	<p>The need for these tests was felt keeping in mind the fact that almost all recruitment companies which visit the campus call for a technical round consisting of tests of this nature, the score of which is used for preliminary screening of students.</p> <p>Keeping in mind the validity and weight of this reason RDIAS wanted to incorporate grammar, logic, reasoning and C Language tests in the form of multiple choice questions, to check the level and depth of student's knowledge. Also, student's would find success on any</p>

educational test when their ability and effort are effectively combined with instruction and resources. At RDIAS we support them with all the resources required to enable them to be masters in their choice of discipline and specialization.

The aim behind running grammar tests for students is that there is a world of difference between spoken English and written English. Not only that, a well written and precise document is understood correctly and in the same sense as the communicator wanted it to be. This fact specially goes well for those students who stress more on programming, analysis, interpretation and have little time left for sentence formulation by inserting in the right words!

Similarly, trainers at RDIAS focus on giving online tests in logic and reasoning to student's because these are the days of quick thinking and immediate implementation. Gone are the days when haste use to make waste. In this era of blended learning with technology, multi tasking and being proactive are the requirements of the day. Good, strong and correct logical skills put a student ahead of his or her peers.

It is noteworthy indeed that for a software technical person , knowledge of C language is a must have. All other languages and parameters are a build up on C! This language ensures that concepts of bitwise operators and pointers remain on the tips of students.

Speed is the buzzword in this age of 24x7...where

	<p>technology never sleeps. To be able to match up with these requirements, students need consistent practice, motivation and support which is provided to its students by RDIAS!</p>
